Each cell shows this style set's specified measurement, the deviation the inspector called against it, and how confidently that was transcribed. **ok** means the inspector said okay; every stated deviation is shown, whether or not it falls inside the tolerance band. **?? in a violet outline** = no verdict for this point of measure was captured from the recording. It is NOT on spec and NOT a pass; it is unanswered and must be checked against the audio. **An orange outline** = outside tolerance. **Blue figures** = heard with under 100% confidence, so confirm against the recording. The two are independent: an outlined cell with blue figures is out of tolerance and wants checking. Grey = a size marked * that this inspection did not measure, so the specification is shown alone. Those carry no reading.

1 of 7 points of measure have no captured verdict (??). This report is NOT final. Each one must be listened back to and filled in before it is sent to a vendor — a missing verdict is not a pass.

?? 4.14A FRONT RISE STRAIGHT TO TOP WAIST — size S: spec 10 1/4, spoken as "Front rise straight to top waist", no deviation or okay captured

Generated from inspection-2026-09-10-111655 and checked against style_2463.pdf. Every value must be confirmed before this report is sent to a vendor.
